

CITYWIDE DECISION MAKING CRITERIA

In evaluating development proposals, capital investments and requests for financial participation in projects, the City should determine that a project meets the majority of the following criteria in order for it to be considered compatible with this Land Use Diagram.

The project should:

1. Help McKinney achieve the Comprehensive Plan's Vision and Guiding Principles;
2. Advance the District's intent;
3. Demonstrate compatibility with the District's identity and brand;
4. Include uses compatible with the Land Use Diagram;
5. Leverage and protect natural and built amenities and infrastructure;
6. Strengthen or create connections to activity centers within and beyond the District;
7. Create a positive fiscal impact for the City through the timeframe of the Plan (2040);
8. Demonstrate that the project's travel demand estimates can be accommodated by the planned transportation network;
9. Demonstrate that the project's demand on other public infrastructure can be accommodated by planned facilities; and
10. Demonstrate that the life-cycle costs to the public of constructing, maintaining and operating infrastructure included in the project is consistent with this plan's fiscal responsibility policies.

Projects proposing placetypes other than those shown in the Land Use Diagram may be deemed consistent with this plan if they meet a majority of the decision-making criteria identified above.

The Preferred Scenario and associated district diagrams serve as a guide for future development and the general placetypes proposed for McKinney. A comprehensive plan shall not constitute zoning regulations or establish zoning district boundaries.
